Subject: RE: Well Destruction

Hi Dan-

A c-57 licensed well driller should do the work and the well should be pressure grouted from the bottom up using a tremmie pipe to deliver the neat cement mixture. The well box should be removed and the top five feet of casing overdrilled or removed by cutting or breaking, then cement capped below grade. The hole should be backfilled with native and the surface repaired to a similar condition (cement, dirt, asphalt top). A permit for the well destruction is required.

Thanks

Nicole

Thank you everyone
I will ask the court house to abandon the well then

If you have a detail I can forward to them on the abandonment that would be great

Hello –

So far I have been unable to confirm when the well in question was installed. It doesn't appear to be associated with any ongoing monitoring projects we have records for. It would probably be the easiest to simply abandon it properly since it isn't private property. If you need information on how to destroy it please just let me know.

Thanks,
Nicole

Thanks Dan - we will look into this a little more to see if it is associated with our project.

The State will be building a new court house in this block.
The well is located in the middle of the block, on the 10th street side of the abandoned alley
A picture of the lid is attached

Let me know if you know who this well belongs too.
thanks

Tu, Jennifer, James and Jim,

Dan England from the City of Modesto informed me this morning that the city is going to construct a new City Hall building in Modesto between G and H Streets and 9th and 10th Streets. I have reviewed the map for the Halfords Plume as well as the figure I have showing the Elwoods Plume and I do not see any impact on our wells but wanted to inform and check with you.

Dan, there is a well referred to as 04 (see attached figure) that is on 10th Street between G and H. According to my records this is a City of Modesto drinking water supply well and is not ours.

Based on my review the city will have no impact on our wells - please let me know if you have different information and do not agree. Thank you.
